

NYC Mini Residency in Oral Implantology

Course Description

This program is designed to teach surgical protocols for endosseous implants in healed or immediate extraction sites. Learn the surgical principles for predictable guided bone regeneration using particulate and block grafts. Clinicians will learn treatment approaches from single to “All on X” fixed detachable prosthesis. There will be “Hands On” exercises daily to reinforce procedures resulting in a consistent revenue stream in private practice.

Brian J. Jackson, DDS
D- ABOI/ID, F- AAID
Board Certified

East Coast Implant Institute (ECII)
Nationally Approved PACE Program Provider for FAGD/MAGD credit.
Approval does not imply acceptance by
any regulatory authority or AGD endorsement.
5/1/2023 to 8/31/2025
Provider ID# 386576

Location: Jay Suites Manhattan, NY
15 W 38th St, New York, NY 10018

Curriculum

Session 1

May 17-19, 2024 (20 CE)

Site Preservation + Endosseous Surgery
Surgical principals protocols and techniques
Osseointegration
Bone classification
Stages of implant healing
Site preservation
Flap design and suturing techniques (Horizontal Mattress, Interrupted)
Anesthesia selection
Medical history- critical conditions
Extraction techniques
CBCT evaluation
Biologics
Hands on exercises: suturing techniques, socket preservation, Endosseous Surgery
- Implant Placement in a healed site

Session 2

June 7-9, 2024 (20 CE)

Restorative implant dentistry, Guided Surgery and Immediate implant placement
Conventional/digital approach
Cement vs Screw retained restoration
Single vs Multiunit prosthesis
Open vs closed tray impressions
Fixture level vs abutment level
Immediate implant placement surgical protocols
Extraction for immediate implant placement
Loading protocols and provisionalization
Guided surgery - fully guided protocol
CBCT reading and treatment planning
Guide fabrication
Hands-on exercises- immediate implant placement and provisionalization, Guided Surgery

Session 3

July 19-21, 2024 (20 CE)

Implant overdentures and full arch approaches
Healed sites vs immediate placement
Prosthetic alternatives, Prosthetics step-by-step
Clinical evaluation and CBCT Imaging
Preparation and surgical approaches
Indication for Mandible and Maxilla
Prosthetic aspect and abutment selection
Materials - Zirconia PMMA
Comprehensive treatment planning
Bone deficiencies
Management of infected sites
Surgical complications & Prosthetic complications
Preventative maintenance
Hands on - Full arch surgery, Full arch prosthesis (Overdenture, all on X)
