

Next Level Dentures

In 3 Appointments!

Wednesday, May 1 2024 | 7:00-8:00 p.m. EDT

This webinar is a must for all dental team members who are looking for a better understanding of the how's and why's of the digital denture workflow.

Methods of creating and fabricating removable prosthetics have seen relatively minor changes in the past... That is, until now. The development and adaptation of computer designed and machine manufactured prosthetics are here - and changing the way we are accomplishing the clinical and laboratory steps for complete dentures! Now, with the advent of even better CAD-CAM technologies for complete dentures, Dentists and laboratories can provide patients with more predictable results, that can be done in fewer, simpler, yet more accurate steps.

This program will review denture fabrication methods and show what techniques have changed (and what has not). The latest in 3D printing processes and materials will be highlighted, showing their strength, accuracy, and esthetics. Systematic clinical guidelines for the 3 appointment denture will be presented that make the chairside steps and results more predictable and easier to accomplish. This program is ideal for Dentists and staff that have been frustrated with denture steps, materials, and procedures.

At the completion of this program, participants will understand:

- Clinical records – what is needed for success, and how to obtain them
- Denture impressions – where we are today
- A simple systematic approach to a 3 appointment digital denture
- Denture fabrication methods and how current CAD-CAM technologies have improved them
- The latest 3D printed denture materials that are stronger than anything ever used
- Utilizing a functional Try-in, and why it's better
- Removable clinical tips & tricks for a less stressful experience and result

Jimmy Stegall
Procedural Solutions Specialist
Dentsply Sirona

Jimmy Stegall is a seasoned dental lab operations and management executive with over 43 years of teaching and clinical experience in the US and Canada. He is a published author and has assisted in research projects with dentists, universities, and manufacturers. After a successful 35 year career helping build and lead a large dental lab in South Carolina, Jimmy is now a National Procedural Solutions Specialist for Dentsply Sirona where he has provided over 430 clinical and laboratory educational events. As a key opinion leader, teacher, and trainer, Jimmy has a demonstrated history of bringing relaxed, informative, results-oriented strategies and techniques to dental practices and labs throughout the US. This speaker is employed full time by Dentsply Sirona
