

Fixed full-arch implant restorations

Mini Restorative Series - Session 3

Instructor Raj Swamidass, DDS, MSD

Hosts MB2 Dental

Leixir Dental Laboratory Group

Sponsor Nobel Biocare

Course overview

The development and evolution of dental implants has had a major impact for the fully edentulous patient. But successful treatment planning requires a thorough examination and understanding of multiple factors, including intraoral, extraoral, and radiographic components. Once these are understood, treatment options for the edentulous patient can be developed. This may include the type of restoration, materials, and technique of implant placement.

This presentation will describe and discuss techniques and materials used in conjunction with fixed full-arch implant restorations.

Learning objectives

- Diagnosis and treatment planning
- Esthetic and functional parameters
- Restorative space requirements
- Conversion workflows
- Conversion to final workflows (analog, digital, material, and design parameters)
- Complications/maintenance

Meet your instructor Raj Swamidass, DDS, MSD

Dr. Raj Swamidass completed his dental degree at Loma Linda University in 2013. Upon graduation he enrolled in dual-major graduate program at Loma Linda University in both prosthodontics and implant dentistry and completed the 4.5-year program in 2017. Dr. Swamidass has received several awards in prosthodontics from his undergraduate and post-graduate studies at Loma Linda University. He has presented posters and research at several professional affiliations including American College of Prosthodontists, American Prosthodontic Society, American Academy of Implant Dentistry, and Pacific Coast Society of Prosthodontics. He

also completed a master of science (MSD) in prosthodontics for research that was supported by a grant given by Nobel Biocare. Dr. Swamidass has also co-authored publications in topics that include CAD/CAM milled dentures, 3D printing, digital workflows in implant dentistry, and removable prosthodontics.

Dr. Swamidass is a board-certified prosthodontist and works private practice at prosthodontics offices in Rancho Mirage and Corona, CA. He also teaches part-time at Loma Linda University and is one of the lecturers for the Loma Linda Maxicourse Program.
