

Get to know our Laboratories

York Dental Laboratory is your partner for a full-service laboratory. Whether it's fixed, removable or implant cases, we are here to service you and your team.

Precision Craft specializes in complex implant cases, removables, full arch and digital dentistry. We offer a mobile lab service for full arch conversions and prosthetic case support.

Leixir New York specializes in removables and same-day repairs. With a combination of experienced and highly trained technicians, this lab can accept all traditional impression cases.

Thompson Suburban is comprised of many skilled technicians who specialize in implant restorations and surgical stents

Blue Box offers concierge-level customer service and can be counted on as your partner in dental excellence.

At C.A.C., commitment, focus and passion are the trademarks of every member on our highly skilled team. This is demonstrated with every case through our unparalleled attention to detail. C.A.C. is dedicated to your most discerning cosmetic patients.

Knight Dental shines through the Milling Technology Center, where we create accurate restorations utilizing computerized modeling with 20 microns of tolerance in every margin. Commercial grade CAD/CAM systems support our highly-skilled technicians, so our restorations exceed your expectations.
