

What Your Dental Laboratory Wishes You Knew About Restoring Implants

ZI LIVE Webcast

Program Description:

In this one-hour webinar, dental professionals will gain essential insights into the implant restoration process from the perspective of the dental laboratory. The course will cover common challenges, best practices, and tips that can help streamline communication between the dental office and laboratory, ensuring optimal results and smoother workflows. This course will provide practical, actionable knowledge that can help improve the efficiency and success of implant restorations, ultimately benefiting both the clinician and the patient.

Program Objectives:

At the completion of the program, participants should be able to:

- Understand the key steps in implant restoration and the role of the laboratory.
- Apply best practices for accurate impression-taking and digital workflows.
- Identify common mistakes to avoid when working with implant restorations.
- Recognize the importance of communication and demonstrate how to effectively convey your needs and preferences to the lab.
- Implement troubleshooting tips for overcoming issues related to fit, aesthetics, and material choices.

Ryan Napolitano, Director: Implant, Surgical & Digital Removable Products - Leixir Dental Group

Ryan has been a dental lab professional for well over 20 years, with experience in independent and corporate dental environments. After graduating from The University of Connecticut with a degree in Communication Sciences, Ryan began working full time at Precision Craft Dental Lab. Ryan has worked in all facets of dental technology, both analog and digital. As time passed, Ryan focused his efforts on integrating new technologies and techniques into the business while focusing his daily efforts on quality control. Following a successful acquisition in 2016, Ryan shifted roles to focus on advancing the digital aptitude of Leixir Dental Lab Group. He has lectured extensively on implant restorations, digital workflows, patient specific treatment planning, and advanced removable prosthodontics. Ryan is Pankey trained, has attended hundreds of hours of CE, is a member of several Seattle Study Clubs, and has been a mentor speaker for several major implant companies over the years. He has been admitted to the American College of Prosthodontists as an Allied member and sits on the board of Dental Lifeline, one of the largest dental charity organizations in the USA.
