

WHY DO BUSINESS WITH BLUE BOX?

Blue Box — your global lab partner with a focus towards iOS and digital workflows, as well as clinical training and education for your group.

WHY CHOOSE US ?

4 Days **In-Lab Turnaround Time**

1.03% **Remake Rate**

1,436 **Total Case Volume**

1,778 **Total Unit Volume**

Materials Used:

- Various PFM alloys (usually based on customer requests)
- 3y/4y zirconia (XTCera, Argen, Ivoclar)
- Lithium disilicate (e.max, Ivoclar)
- MiYO System by Jensen Dental (Stain&Glaze ZR system)
- Creation by Willi Gellar (Layered Zirconia & PFM System)
- Ivoclar IPS Porcelain (Layered eMax)
- Implant Components Used
 - OEM (Varies by client request and implant placed)
 - Leixir Preferred
 - Preat Corporation
 - Dess Implant Components

Material Validation:

- Blue Box will provide all appropriate IdentAlloy and IdentCeram certificates for materials used at the Client's request. All raw materials are FDA registered materials and are checked by Blue Box for order accuracy and adherence to any expirations.
- Materials used in fabrication are subjected to internal validation by the Blue Box team to ensure compliance with stated usage of the material.

Quality Assurance:

Our Blue Box technicians meticulously oversee every case that comes into and leaves our laboratory, ensuring adherence to our rigorous standards. Our domestically manufactured product uses our lab management system to record each inspection step.

Depending on the requirements, international products are inspected to specific requirements established by the customer, type of product, international partner, and then finalized prior to shipping.

• SOPs are available for review of our manufacturing process including in-line QC steps, fabrication steps, and material usage.
