

MASTERING FULL-ARCH WORKFLOWS WITH THE NEXUS iOS DIGITAL ECOSYSTEM

Max McLennan
Director, Global Product Management - Digital Solutions - Keystone Dental Group

COURSE SUMMARY

Join this one-hour webinar to learn how to simplify and improve full-arch implant workflows using the Nexus iOS Digital Ecosystem. Discover how Nexus Scan Gauges enable accurate digital impressions with your intraoral scanner, and how the Nexus Scan Analyzer provides real-time verification—creating a virtual verification jig and eliminating uncertainty.

We'll also cover how seamless integration with Leixir Lab through a client portal enhances collaboration, speeds up case submission, and improves outcomes. Plus, learn how the Leixir and Keystone partnership supports a more efficient, predictable full-arch workflow.

LEARNING OBJECTIVES

- Capture accurate full-arch impressions with Nexus Scan Gauges
- Improve efficiency with a fully digital workflow
- Verify scans in real time using Nexus Scan Analyzer
- Streamline lab communication with Leixir Lab

Max's Career in dentistry started by introducing the industry changing Nexus iOS full-arch solution to the Australian market back in 2020 with Osteon Medical. Developing unique solutions to advance training, protocols, and patient outcomes—including the introduction of Nexus iOS to North America. Since then, Max has lead the development of Nexus Connect Lab, opening the chair side and prosthetic benefits of the Nexus solution to labs and their partners.
