

FULL-ARCH SUCCESS: DIGITAL WORKFLOWS, PREDICTABLE OUTCOMES, & PRACTICE GROWTH

COURSE SUMMARY

Full-arch implant dentistry requires precision, efficiency, & a well-coordinated digital workflow to achieve predictable outcomes. This program is designed to help clinicians optimize their full-arch protocols through the integration of advanced digital technologies, streamlined surgical & restorative workflows, & effective patient acquisition strategies.

Participants will gain insight into digital treatment planning, intraoral scanning protocols, & the collaboration between clinician & laboratory to improve accuracy, reduce chair time, & enhance overall case predictability. The program will also explore how to identify, educate, & convert full-arch candidates to support sustainable practice growth.

The course will conclude with a live patient demonstration, showcasing a complete digital workflow—from scan to final prosthesis delivery—highlighting how technology & team alignment drive consistent, efficient, & high-quality results for both clinician & patient.

LEARNING OBJECTIVES

- Understand a streamlined digital workflow for full-arch cases
- Leverage intraoral scanning & digital technology for improved outcomes
- Recognize the value of partnering with the right dental laboratory
- Identify & convert full-arch candidates through direct to patient marketing
- Observe a complete full-arch workflow from scan to final delivery

Date: Friday, June 5, 2026

CE: Attendees will earn 5 CE Credits

Tuition: \$99

Time: 8:30am-9:00am: Registration & Breakfast

9:00am-3:00pm: Lecture, hands-on & live patient demonstration (lunch will be provided)

Location:

Precision Craft Dental Laboratory: 37 Thurber Blvd., Bldg. B, Smithfield, RI 02917
