Program Overview

The Digital GP: Bridging Tech and Technique

This is a two-day dental education event focused on helping general practitioners adopt digital workflows, especially for implants and dentures. It begins Thursday evening with a sponsored hotel stay and a networking happy hour. On Friday, the program combines education, hands-on exposure, and networking. The day starts with breakfast and an overview of how digital dentistry is transforming general practice. Attendees then tour A-dec's facility, where they see operatory design, ergonomics, and integrated implant technology in action. The core of the program is a deep dive into digital implant workflows, covering fundamentals, treatment planning, guided surgery, and collaboration with labs—aimed at making implant procedures more predictable and efficient for beginners or those building confidence. After lunch and showroom exploration, the final session focuses on streamlined digital denture workflows, showing how a three-appointment process can improve efficiency and patient outcomes. The event wraps up with a Q&A and practical guidance on implementing these digital systems in everyday practice.

Featured Speakers

Lindsey Figueroa, RDH has nine years of clinical experience in dental hygiene, with a strong foundation in patient care and restorative workflows. She specializes in intraoral scanning and digital denture workflows, with particular expertise in edentulous cases and achieving precise, well-fitting prosthetics. As a Digital Specialist, Lindsey helps clinicians optimize digital workflows and strengthen collaboration with laboratories to improve efficiency, predictability, and patient outcomes.

Dr. Adam Foleck is an internationally recognized implant educator with over 15 years of lecturing experience. A KOL for Dentsply Sirona (MIS Implants), he co-directs the Chicago Implant Institute and leads Implant Mentoring Partners. Owner of The Foleck Center, his practice focuses on GBR, implant placement and restoration, full-arch rehabilitation, and anterior esthetics. He is an expert in digital guided surgery, a Diplomate of the American Board of Oral Implantology, and an active member of the Academy of Osseointegration.
