

THE DIGITAL DENTURE REVOLUTION: POWERED BY INTRAORAL SCANNING

COURSE SUMMARY

Digital dentures are redefining removable prosthetics—and intraoral scanning plays a critical role in enabling more efficient, predictable workflows. In this session, explore practical techniques for capturing edentulous arches and optimizing digital denture production.

Learn how to reduce the number of appointments, improve patient experience, and deliver high-quality prosthetics with greater consistency.

LEARNING OBJECTIVES

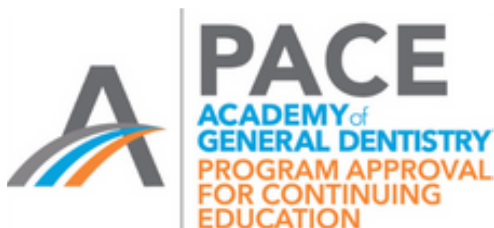

- Understand the clinical benefits of intraoral scanning for edentulous and denture workflows
- Learn techniques for accurate full-arch and soft tissue capture
- Reduce appointments and streamline production with digital denture workflows
- Improve turnaround times and overall treatment efficiency

Date: Wednesday, July 8, 2026

Time: 7:30 p.m. - 8:30 p.m.

Tuition: Complimentary

CE: Attendees will earn 1 CE Credit

Leixir Dental Laboratory Group
Nationally Approved PACE Program Provider for
FAGD/MAGD credit.

1/1/2025 to 12/31/2026

Veronica Blea

Veronica Blea has been in the dental field since 2008 where she worked as an expanded duty dental assistant and treatment coordinator. She did most of her training in a general practice and specialized in cosmetic dentistry before joining the DEXIS team. Veronica offers IOS training to our clients and not only educates on how to implement your intraoral scanner into your office but also how to increase productivity and improve patient care.
