Transform Your Practice with Digital Dentures

Course Summary

Explore the latest advancements in digital denture technology and discover how 3D printing, advanced materials, and digital workflows are transforming accuracy, efficiency, and patient outcomes. This course will take a closer look at how to scan for different digital denture workflows, with a focus on key considerations for edentulous cases and strategies to get more from your intraoral scanner. Learn how to improve scanning accuracy and efficiency, navigate common challenges, and capture the information your laboratory needs to support a streamlined workflow. Attendees will also explore how stronger doctor-lab communication and digital best practices can help create a more efficient experience from the initial scan through the final denture.

Learning Objectives

Upon completion of this course, attendees will be able to:

- Recognize scanning approaches and considerations for different digital denture workflows.
- Identify strategies to improve intraoral scanning accuracy, efficiency, and overcome common challenges.
- Apply best practices for doctor-lab communication to support predictable denture outcomes.
- Understand digital denture technology and the benefits of digital workflows.

Carey Kalberer
Senior Director of Sales
Leixir Dental Laboratory Group

Carey brings more than 20 years of experience in the dental industry, including over a decade in leadership roles at Thompson Suburban Dental Lab and Leixir Dental Laboratory Group. She has held positions across sales, marketing, and general management, giving her a strong understanding of clinical and laboratory workflows.

Currently serving as Senior Director of Sales, Carey focuses on digital dentistry integration and workflow optimization. A certified trainer on multiple leading intraoral scanner platforms, she works closely with clinicians to implement digital solutions that improve efficiency, accuracy, and patient outcomes. Her background as an implant coordinator and ongoing commitment to continuing education have made her a trusted resource in digital and implant-driven restorative workflows.

Brooke Prain, RDH
Senior Digital Specialist
Leixir Dental Laboratory Group

Brooke Prain is a University of Michigan graduate, earning her degree in Dental Hygiene in 2018. With a strong clinical foundation and a passion for advancing dental technology, she joined Align Technology as a Digital Adoption Specialist, where she spent over three years training dental practices on the iTero intraoral scanner and supporting the transition to digital workflows. Brooke has since moved into the dental lab side of the industry, expanding her expertise in digital dentistry and strengthening the connection between clinical practices and laboratory precision. Her combined clinical, technological, and lab experience allows her to bridge the gap across the full digital dentistry ecosystem.
