AI-Powered Full-Arch Implant Workflows: Driving Predictability, Efficiency, and Clinical Success

Course Summary

As demand for full-arch implant treatment continues to grow, digital technologies and artificial intelligence are transforming the way clinicians deliver care. This course explores a streamlined AI-powered workflow that reduces treatment time to just 2-3 patient visits while maintaining accuracy, efficiency, and predictable outcomes. Attendees will gain an overview of the complete digital process, from data capture and treatment planning to try-in, 3D printing, and final restoration delivery. The course will also highlight the critical role of a collaborative laboratory partner in achieving successful, predictable full-arch outcomes.

Learning Objectives

Upon completion of this course, participants will be able to:

- Describe the benefits of an AI-driven digital workflow for full-arch implant treatment.
- Identify the key steps involved in a comprehensive digital full-arch protocol.
- Explain the role of digital design, prototype try-ins, and 3D printing in treatment delivery.
- Recognize how optimized workflows improve efficiency, accuracy, and predictability in full-arch restorations.
- Discuss the importance of partnering with an experienced dental laboratory to support clinical success and restorative outcomes in full-arch implant cases.

Date: Wednesday, November 4, 2026
Time: 7:00-8:00 p.m. ET

Tuition: Complimentary
CE: Attendees will earn 1 CE Credit

Dr. Michael Klein D.D.S.

Dr. Klein is a Surgical Prosthodontist & former Clinical Associate Professor at NYU College of Dentistry for 17 years. A Diplomate of the American Board of Oral Implantology & Fellow of the Greater NY Academy of Prosthodontics,he pioneered computer guided dental implant surgery & holds 8 patents.
